

Lead Generation for Weight Loss Clinics

Proven online lead generation program for medically-supervised weight loss clinics.

Acquire **25+** new patients a month

Proven results of **over 800% ROI**

Move ahead of your local competitors

SET MORE APPOINTMENTS

OppGenetix captures prospective patients that are searching for weight loss treatments in your local area. We are not in the business of driving "traffic" to your website. We have developed a unique multi-channel patient generation program that features relevant landing pages specifically for your medically-supervised weight loss clinic that are proven to generate "appointment-ready" leads.

NATURAL WEIGHT LOSS PROGRAM

Whether you're promoting a medically-supervised diet and nutrition plan, or a new fitness program at your clinic, we can help you reach the right patients who are looking for a natural weight loss solution to obtain their goals.

MEDICAL WEIGHT LOSS PROGRAM

Unlike natural weight loss programs, customers evaluating a medical weight loss solution seek reassurance as well as expertise when it comes to the diets, tests, fitness regimes, diagnostics and supplementation. It's critical to establish credibility and provide prospective patients with proper knowledge before scheduling their consult.

BODY CONTOURING PROGRAM

As a weight loss procedure, non-surgical body contouring is still new to most people, so your marketing will need to educate as well as inform. Targeting the most effective audiences is critical, and we'll ensure our program does exactly that.
